

6TH ANNUAL

The Bull Sale

FRIDAY **MARCH 15** 2019

1 PM AT THE FARM, CROSSFIELD, ALBERTA

OFFERING 67 YEARLING ANGUS BULLS

71F

51F

General Information

BOARD/DELIVERY: SSF will feed all bulls until April 15, 2019 at no additional cost to the buyer. If the buyer wants the bull at a later date than April 15 arrangements can be made for SSF to board the bull at a fee of \$3.00 per day per head. SSF will deliver all bulls in Western Canada at no charge to the buyer. SSF will assist in arranging delivery and cost share to Ontario, Quebec, Maritimes and U.S. destinations.

INSURANCE: The bull(s) become the property of the buyer as soon as the bull is sold. Insurance will be available sale day and Scott Stock Farm Ltd. requests all bulls staying at the farm for a later delivery date be insured. SSF is not responsible for injury or death.

SEMEN: SSF retains half semen interest in all bulls.

TERMS: Terms of sale are cash or cheque. All bulls must be settled for at the conclusion of the auction.

BULL HEALTH/GUARANTEE GUIDELINES: All bulls will have passed a satisfactory semen test and visually appraised for soundness by a licensed veterinarian prior to sale day. Bulls, if failing to be breeders, will be replaced by a bull of equal value and quality or a sale credit will be given towards the purchase of another SSF bull. No refunds will be given. Scott Stock Farm Ltd. will follow the terms and conditions as stated in the Canadian Angus Association's Breeders Guarantee Guidelines on all bulls sold. All bulls are on a complete herd health program including Ivermectin at weaning and again in January.

LIABILITY: Scott Stock Farm Ltd., its owners or employees accept no liability for accidents that may occur or assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

TWO breeds in **ONE** sale

Quality Black & Red Angus Bulls

SHELBY, JON, CAMILLE & BOW

On behalf of Scott Stock Farm we would like to Welcome you and your family to our 6th Annual Sale. I would like to start off with thanking you, our valued customers and friends. Thank you for many years of support and confidence in our program and for making our operation a viable program. We are always working hard to improve our operation from genetic selection and feet & udders. We strive for sound functional cattle.

Some people ask me why we have both Black and Red Angus. True, it's double the work searching for new & different blood lines for each. The answer is simple. We feel there is individual value in both.

Black Angus traditionally are known for maternal strength. There is no female in any other breed that looks as good as a Black Angus mother cow that's feminine with a good udder. She will look after her calf without assistance and wean off a big calf. The American Angus Association calls themselves "The Business Breed" and has become a household name for their Certified Angus Beef program.

Red Angus are easy doing cattle with calving ease. The Red Angus have always maintained a focus on the commercial cattle operations, striving to cross well on all & any breed. The Red Angus gene pool is a lot smaller than the Black. However, the Red breed has many of the wanted traits of the Black Angus! Both breeds remain a consistent source of genetics for extremely desirable qualities such as carcass quality, maternal strength, and outstanding feeding characteristics.

All but two of our entire sale offering is out of AI sires. Using proven AI sires gives us more strength in our breeding program. The sires we use already have been tested in numerous other herds which allows us to evaluate their track record. Using these AI bulls gives us more accurate information and data for us to evaluate. It allows us to be more confident in what they should do in our herd. This is a big lead for us that not all operations get to take advantage of.

We try to make a trip to the US several times a year to see these AI bulls and their progeny in person and evaluate them before we decide to use them. It's an intense few months during breeding season, but you can not match the consistency we see in our offering without using this method.

The group of bulls has come together once again this year. Since weaning they have been on a total TMR consisting of a pellet, hay and silage mix. At no time have these bulls been pushed to the max. We think they will be in just the right shape and condition for your evaluation on sale day. We strongly recommend coming before the sale to see the bulls and dams. Every bull is guaranteed and backed by SSF. Whether you buy Black or Red or both If there is ever a problem we will work with you to make things right.

On sale day, come early to join us for the best hospitality around. We will again be serving steak dinner and Grandma Debbie's homemade pies for desert.

Jonathan & Scott

Spartacus was a crowd favorite in Bieber's 2014 sale selling to Accelerated Genetics. Powerfully made and very stout boned he is a very complete, powerful made, long bull with excellent performance. Stacked for profit he records EDPs that rank in the top 3rd of the breed or higher for 9 traits. He has a great disposition and passed it onto his progeny. A bull that does a lot of things right. His easy doing steer calves will have added length. His heifer calves will be deep ribbed attractive females.

Redemption is one of the most complete phenotype red bulls in the industry - moderate, sound, wide based, deep with great feet and disposition. Unmatched EPD package. A big spread bull from calving to weaning. Expect rapid growth with performance. He is the top selling Red Angus bull of all time at Genex.

Platinum has a lot of muscle. He's big topped and wide based. He has a big foot and is very sound. He has passed these traits onto his progeny. 2017 was our first offering of Platinum calves and they sold like hot cakes - 16 sons averaged \$5900. We are calving his first set of females right now and they are beautiful, moderate females that have a lot of rib and excellent udders.

Might be the darkest red bull in the sale! Total package here ... lots of eye appeal in this attractive New Direction son. He's got lots of natural muscle in his forearm and steps down on a big solid foot. For those of you who study Angus pedigrees there will be lots of familiar bloodlines here from Mulberry to Matrix!

Arsenal was bred by Connealy Angus in Nebraska, a large operation with a deep selection of AI sires and a top source for Angus genetics. Packer 547 was very popular for his quiet disposition and fertility. On the cow side is Forward, a very complete bull known for calving ease, growth, muscle and disposition.

Arsenal is a wide topped, deep flanked bull with depth and tremendous growth and eye appeal. He will sire thick meaty steers and top replacement heifers.

Final Solution is a deep bodied bull with a lot of overall muscle mass carrying down well into his bottom third quarter. With growth and maternal strength he will sire steers with muscle and heifers that will work in your herd for years to come. He goes back to an Angus living legend "Final Answer". Final Answer was the No.1 registration sire in the breed for 2012. He is the sire of moderate, efficient replacement females with beautiful udders.

Longest bull in the sale I would bet. So much performance packed into this guy. He was the heaviest weaned bull at 984 lbs!!!! But wait, would you believe he is out of a first calf heifer ... that's impressive genetics there. 3F goes back to Tour of Duty who was one of the most used Angus Sires in the industry. He was known for putting growth, length and muscle into his offspring. Stack that with Final Solution and you get Lot 3F!!! Good breeding here!!!

A lot of length of body in this bull. Thickness down his top and he carries that muscle deep down into his lower hip. Out of first calf heifer. She did a great job and weaned this calf off at 724 lbs!

Here is an impressive future herd sire. Long, deep bodied, attractive, and thick. Would you believe he is out of a first calf heifer ... and 7F was the 2nd heaviest weaning weight at 856 lbs! 7F will raise you scale tipping steers but also females you can retain that have longevity. He goes back to our Haley Cow family that has too many daughters in our herd to count!

It was just starting to snow when the fog settled in during pictures on this guy. Here is a deep bodied bull with lots of volume and rib. He is long from hooks to pins and when you get behind him he has lots of width. This bull is a perfect example of Arsenal son. Wide topped, deep flank and performance. He is out of a 5 year old Rainmaker cow, who we sold her first calf to Murray Hanson.

53F is a perfectly balanced bull. Lots of eye appeal, especially I like his Angus type head. The cow was designated an "Elite" Dam by the Canadian Angus Association. This is based on producing High Performance offspring such as her 2015 born bull Mr. Ron Davis purchased.

Please note that the EPDs listed in this sale catalogue are the product of the new Canadian AngusONE Genetic Evaluation. These EPDs are calculated by Angus Genetics Inc in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. This is a completely new base for Canadian Red Angus however, therefore, please be advised that the EPDs are not comparable to last year's EPDs for Red Angus. These EPDs are on a completely different scale, so please familiarize yourselves with the new Breed Average and with the new threshold number for traits of importance to you. The new AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at www.cdnangus.ca. The right EPD for you will depend on your cow herd, your management, and your breeding goals. For more information on using EPDs please contact your Association, the Canadian Angus Association, at 1-888-571-3580, and for more information about the genetics offered in this catalogue and what might best suit your breeding needs please contact the seller.

Actual	205 days	+1.2	+35	+58	+19	+36	+2.4

EPD DEFINITIONS

EXPECTED PROGENY DIFFERENCES

EPDs are an estimate of how future progeny of each sire can be expected to perform in each traits listed.

BW: Birth Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. Weaning weight is an indicator of growth from birth to weaning (205 days of age). The calf's growth during this period is influenced by its own ability to grow plus its mother's maternal abilities.

YW: Yearling Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MILK: Milk EPD - is an indicator of milking ability in daughters. It represents the differences in weaning weights of calves due to the amount of milk produced by their mothers. It is expressed in pounds of calf weaned.

TM: Total Maternal EPD - is a combination of the weaning weight and milk EPDs. It is calculated as: 1/2 Weaning Weight EPD + Milk EPD = Total Maternal. This EPD represents the differences in weaning weights between calves due to mothering and milking ability of their dams.

CE: Calving Ease Direct - predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the Calving Ease EPD, the more likely it is that the animal's calves will be born without assistance.
